

Chewable Calcium 60 Tablets

EAN: 5055148401733 FABRICANTE: LAMBERTS

Lamberts calcium is useful for maintaining bones in normal conditions.

DESCRIPTION

Calcium contributes to normal blood clotting, energy metabolism and the normal process of cell division and differentiation. It also contributes to the normal functioning of neurotransmission, digestive enzymes and muscles.

Calcium contributes to reducing bone demineralization in postmenopausal women. Low bone mineral density is a risk factor for osteoporotic bone fractures. This benefit is achieved with a daily dose of at least 1200 mg in women aged 50 years or older.

Calcium tablets tend to be very bulky, which is why we have developed these chewable calcium tablets, with a pleasant lemon flavour, to make them easier to take and encourage daily use by the whole family.

This product is suitable for all ages, especially for children who have a high calcium requirement and cannot take tablets.

White round tablet.

Each tablet provides:

Vitamin D3	2.5 µg
Calcium (as Carbonate)	400 mg
Fructo-oligosaccharides (FOS)	1000 mg

Allergen note

The following list of allergens are excluded: wheat, gluten, barley, soya, eggs, milk and dairy products, lactose, nuts, sulphites, celery, fish, shellfish and yeast.

Precautions

None known at the recommended dose.

Chewable Calcium 60 Tablets

EAN: 5055148401733 FABRICANTE: LAMBERTS
