

## Florisene 90 Tablets

EAN: 5055148412562    FABRICANTE: LAMBERTS

*Florisene® Formula to help with Chronic Telogen Effluvium or CTE. Clinically proven formula that helps hair growth. Award. Winning product at the Hair Science Awards 2018 held in the UK.*

### DESCRIPTION

Unique formula clinically proven to aid hair growth.

? Florisene® is a clinically proven supplementation program.

? Developed by one of Britain's leading hair specialists, after 10 years of clinical research.

? Contains a highly absorbable form of iron.

? A significant level of the essential amino acid, L-lysine.

? Contains 2 nutrients that act synergistically with iron, such as vitamin C and vitamin B12.

? In addition to biotin and selenium that contribute to the maintenance of normal hair.

Florisene® is a dietary supplement formulated to help address the most common hair loss in women, due to Chronic Telogen Effluvium or CTE, as it provides iron to reduce its deficiency together with essential nutrients that help stimulate hair growth in women.

Research has revealed that a significant portion of the female population experiences excessive and persistent hair loss due to chronic telogen effluvium or CTE, and has also shown that the main cause of CTE is a low level of serum ferritin, which reflects the amount of iron stored in the body.

When serum ferritin falls below a certain point, which can vary from one individual to another (usually between 40-70 µg), the hair growth cycle is interrupted and causes gradual hair loss, with consequent loss of volume. In other women, hair loss is more obvious, with greater hair loss when washing or brushing.

Low ferritin levels in women are currently a widespread problem due to the reduction in red meat consumption and menstrual losses that occur in women of reproductive age.

Research has shown that if ferritin levels are brought above the individual trigger point, then normal hair growth is gradually restored.

Studies also underline the importance of providing, in addition to the necessary amount of iron, nutrients that contribute to hair growth, in the appropriate doses and chemical forms.

After extensive research, our Florisene® is formulated to provide the right vitamins and minerals in highly absorbable forms. This patented formula provides:

- Iron, which contributes to the normal formation of red blood cells and hemoglobin, normal cognitive function, normal energy-yielding metabolism, normal oxygen transport in the body, as well as the normal functioning of the immune system, also helping to reduce tiredness and fatigue.
- Vitamin C, which improves iron absorption, helps reduce tiredness and fatigue, contributes to the normal functioning of the immune system, to the protection of cells from oxidative damage, to normal psychological function, to the normal functioning of the nervous system, as well as to the normal formation of collagen in the skin, blood vessels, gums, etc.
- Vitamin B12, which contributes to the normal functioning of the nervous system, to the normal metabolism of homocysteine, to normal psychological function, to the formation of red blood cells, helps to reduce tiredness and fatigue, and to the process of cell division.
- Biotin contributes to the maintenance of normal hair and skin, to the normal functioning of the nervous system, to normal energy metabolism, to normal macronutrient metabolism, to normal psychological function as well as to the maintenance of normal mucous membranes.
- Selenium contributes to the maintenance of normal hair, the normal functioning of the immune system, the maintenance of nails, normal thyroid function, the protection of cells against oxidative damage as well as normal spermatogenesis.

Contains a significant amount of the essential amino acid L-lysine.

The effects of Florisene® are medium-term, depending on the person, so you should wait about 6 months for excessive hair loss to decrease and for new hair growth to be seen.

It is suitable for vegetarians and vegans.

**Oval tablet with red coating.**

**Each tablet provides:**

Vitamin C	24 mg
Vitamin B12	3 µg

## Florisene 90 Tablets

EAN: 5055148412562 FABRICANTE: LAMBERTS

Biotin	50 ?g
Iron (as ferrous fumarate)	20 mg
Selenium	10 ?g
L-Lysine	500 mg

### Suitable for vegetarians.

### Allergen note

The following list of allergens are excluded: wheat, gluten, barley, soya, eggs, milk and dairy products, lactose, nuts, sulphites, celery, fish, shellfish and yeast.

### Precautions

While you are taking Florisene® do not take any other supplements containing iron.

Consult your doctor before taking Florisene® during breastfeeding or by women planning to become pregnant.

Florisene® should not be taken in conjunction with oral antibiotics. Do not take Florisene® within 2 hours of taking any medication, including digestive remedies.

This amount of iron may cause mild stomach upset in sensitive individuals. This product contains iron, which if taken in excess, may be harmful to very young children.

### Instructions for use

How to take: Florisene® tablets should be swallowed whole with water, half an hour to one hour before any meal or on an empty stomach.

How much to take: Take one tablet daily.

In one study, women using Florisene® noticed a reduction in hair loss within three to four months after starting to take it. It may take 6 months or more to see the full benefits.
