

Glucosamine and Phytodroitin 120 Capsules

EAN: 5055148413767 FABRICANTE: LAMBERTS

Glucosamine Sulfate Complex (GlucosaGreen®) and Phytodroitina? (100% vegetable). Vegan alternatives for arthritis and osteoarthritis.

DESCRIPTION

Due to the change in the process, this month you may find two versions of this product on the market. We apologize for any inconvenience.

- Same formula, new raw materials.
- Each tablet provides 467 mg of glucosamine sulfate, provided by GlucosaGreen®.
- GlucosaGreen® is the bioequivalent to glucosamine derived from seafood and is suitable for vegans.
- Provides over 110 mg of Phytodroitin?, equivalent to 100 mg of chondroitin.
- Phytodroitin? is a plant-based alternative to chondroitin.
- Provides two nutrients at the same levels as those used in clinical studies.
- This product does not contain sodium or salt (NaCl).

By combining two important nutrients, each Lambert's® Glucosamine and Phytodroitin? Complex tablet contains 467 mg of glucosamine sulphate, the level used in many studies.

In addition, our product uses GlucosaGreen®, the world's first commercially available glucosamine, produced by a revolutionary direct fermentation process. Bioequivalent to shellfish-derived glucosamine, GlucosaGreen® is vegan-friendly and provides complete transparency and traceability in the supply chain, addressing the numerous challenges inherent in producing chitin-derived shellfish, such as:

- Availability of raw materials.
- Allergen concerns.
- Environmental pollution caused by the process of extracting chitin from shellfish.

Our product combines GlucosaGreen® with Phytodroitin?, a plant-based alternative to chondroitin, made from a blend of seaweed extracts. It provides 110 mg of Phytodroitin?, equivalent to 100 mg of pure chondroitin.

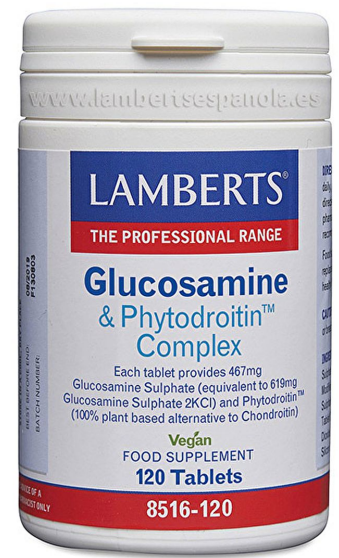

White coated oval tablet.

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241217
