

## Glucosamine Sulfate 2KCl 120 Tablets

EAN: 5055148413828

FABRICANTE: LAMBERTS

*Food supplement necessary for cartilage.*

### DESCRIPTION

Glucosamine is good for cartilage (the soft tissue that lines the joints), so when our body is unable to produce enough natural glucosamine, supplementation may be an option.

Foods relatively rich in glucosamine are: crabs, oysters and shrimp shells.

Like the rest of our range, the formulations for these products are the result of a deep understanding of the latest nutritional research and are supported by a scientific basis. Most importantly of all, they are also correctly potentiated, as dosage is the key to success when using nutrition in clinical practice.

Glucosamine is available in several forms. We selected glucosamine sulfate because it is the substance that has been used repeatedly and successfully in studies. It also has an exceptional absorption rate of 90-98%.

LAMBERTS<sup>®</sup> Glucosamine Sulfate 1400 mg has become one of the preferred brands among professionals, due to its potency and affordable price.

We use the highest quality GlucosaGreen<sup>®</sup> in our product, which emulates the glucosamine produced naturally by the body.

Manufactured under strict GMP pharmaceutical manufacturing standards, two tablets daily provide a total of 1400 mg of pure glucosamine sulfate (equivalent to 1858 mg of glucosamine sulfate 2KCl).

- The dose of glucosamine sulfate typically used in clinical studies.
- Adequate concentration in an affordable product.
- Often used in conjunction with Fish Oil.

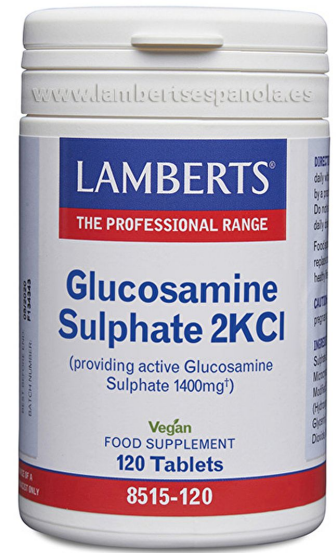

Oval tablet with light beige coating.

## Glucosamine Sulfate 2KCl 120 Tablets

EAN: 5055148413828

FABRICANTE: LAMBERTS

### Two tablets provide:

GlucoseGreen <sup>®</sup>	
Glucosamine Sulfate 2KCl	1858 mg
containing:	
Glucosamine Sulfate	1400 mg
Providing	
Glucosamine Base	1100 mg
