

## L-Ornithine 500 mg 60 Capsules

EAN: 5055148403195

FABRICANTE: LAMBERTS

*L-Ornithine 500 mg in free form. Non-essential amino acid. Amino acids build proteins for cell formation.*

### DESCRIPTION

Amino acids are used by the body to build proteins.

Proteins are essential for the formation of cells, and are also linked to the biochemical structure of hormones, enzymes, neurotransmitters and antibodies.

Amino acids are classified as essential or non-essential.

Essential amino acids cannot be synthesized in the body and must be obtained through diet, while non-essential amino acids, although extremely important for health, can be synthesized in the body and are therefore not classified as "essential."

LAMBERTS<sup>®</sup> amino acids are in "free form", that is, they are ready to be absorbed and used by the body (they do not need to be digested).

L-ornithine can be synthesized from arginine, so it is considered a non-essential amino acid.

LAMBERTS<sup>®</sup> L-Ornithine is presented in its free form and each capsule provides a total of 500 mg of L-Ornithine.

It is manufactured in the UK under strict GMP pharmaceutical manufacturing standards.

Cream colored powder in a clear hard capsule.

### Each capsule provides:

L-Ornithine HCl	500 mg
-----------------	--------

### Disintegration time:

Less than 1 hour.

## L-Ornithine 500 mg 60 Capsules

**EAN:** 5055148403195    **FABRICANTE:** LAMBERTS
