

Multiguard Osteoadvance 120 Tablets

EAN: 5055148412166 FABRICANTE: LAMBERTS

Multi-Guard® Osteo Advance 50+, Multivitamin, Bone Wellness. Significant levels of Calcium, Magnesium, Vitamins D, K and more.

DESCRIPTION

This is a multi-nutrient formula to support the bone system and with very balanced doses of each nutrient, which makes it an ideal choice, since no other multivitamin and mineral supplement is needed while taking this product. This nutritional supplement, in addition to 800 mg of calcium and 300 mg of magnesium per daily intake, also provides excellent amounts of all the important minerals, such as selenium, zinc and chromium.

Because calcium and magnesium are needed in such high amounts, it is impossible to include them in a One-A-Day formula, so most formulas neglect these two essential macro minerals for bone health.

That's why, prior to this product, we have always recommended Osteoguard® as the perfect companion to our One-A-Day multi-nutrients, such as Multi-Guard® and Multi-Guard® Advance.

This formula also contains high levels of B vitamins for heart protection, vitamins C and E as antioxidants, and vitamins D and K that contribute to bone health. Manganese and copper are also present to contribute to the maintenance and normal formation of connective tissue.

It is widely recognized that calcium and vitamin D contribute to reducing bone demineralization in postmenopausal women, and low bone mineral density is a risk factor for osteoporotic bone fractures in women over the age of 50.

On the other hand, notable concentrations of plant compounds such as turmeric, lutein, grape seed and rosemary are also provided in this formula, since all of them are highly valued by nutritionists due to their important protective functions in the body.

The tablets are medium sized and coated to make them easy to swallow, and like all our supplements they are manufactured in the UK under strict GMP pharmaceutical manufacturing standards.

Oval tablet with orange coating.

Three tablets provide:
