

Omega 3 Children 100 Capsules

EAN: 5055148407483

FABRICANTE: LAMBERTS

Omega 3 Children from Lamberts helps the normal functioning of the psychological nervous system, increasing physical and intellectual performance.

DESCRIPTION

Specially formulated for children, it also contains important vitamins A, C, D and E, which together provide many nutritional benefits, including:

- Nutritional support for the daily diet during this important stage.
- It helps the immune, nervous and psychological systems function properly due to its contribution of vitamins A, C, D and E.
- It increases physical and intellectual performance, making it a good support during periods of intense study.
- An aid during periods of growth and development.
- It contributes to the protection of cells against oxidative damage due to its content of vitamins A, C, D and E.

With a total of 100 mg of DHA per capsule, our LAMBERTS® Omega 3 for Kids with forest fruit flavour has been specially formulated for ages 3 and up.

Chewing the softgel releases a delicious natural currant flavour that provides omega-3 fatty acids along with essential vitamins A, C, D and E. This product is manufactured under strict GMP pharmaceutical manufacturing standards.

- Omega 3 Essential Fatty Acids DHA and EPA.
- Vitamins A, C, D and E.
- From 3 years old.

Fatty Acids: ?-linolenic and linoleic acid: They are necessary for the normal growth and development of children.

Docosahexaenoic acid (DHA): Contributes to normal visual development in children up to 12 months of age. It also contributes to the normal development of the eyes and brain in fetuses and breastfed infants.

Omega 3 Children 100 Capsules

EAN: 5055148407483 **FABRICANTE:** LAMBERTS
