EAN: 5055148412425 FABRICANTE: LAMBERTS

With Lamberts Pulse, most risk factors for cardiovascular disease are modifiable and can therefore be changed. The main risk factors are: hypertension, high cholesterol and triglyceride levels, obesity, high waist circumference, diabetes (especially if poorly controlled), stress, and a sedentary lifestyle.

DESCRIPTION

PULSE® is a superior two-capsule-a-day formula that provides 1300 mg of pure fish oil and 100 mg of Coenzyme Q10 (CoQ10).

These capsules contain concentrated fish oil that provides a total of 1040 mg of omega 3 per two capsules.

The fish oil undergoes a sophisticated purification process that ensures it is virtually odour-free, with contaminant levels well below strict EU maximum limits.

The encapsulated oil is then protected from oxidation by the inclusion of natural vitamin E (and Co-Q10).

The most beneficial ingredients in fish oil are the two omega-3 fatty acids, EPA and DHA, and our formula provides 715 mg of EPA and 286 mg of DHA per two capsules. EPA and DHA contribute to normal heart function and the maintenance of normal blood triglyceride levels. The beneficial effect is obtained with a daily intake of 250 mg of EPA and DHA.

Another nutrient that has been in the focus of research is CoQ10, and we have included a total of 100 mg per two capsules as it is recommended for those taking statins, (a medication used to lower cholesterol and which has been shown to deplete the body of CoQ10). We offer CoQ10 in its natural form.

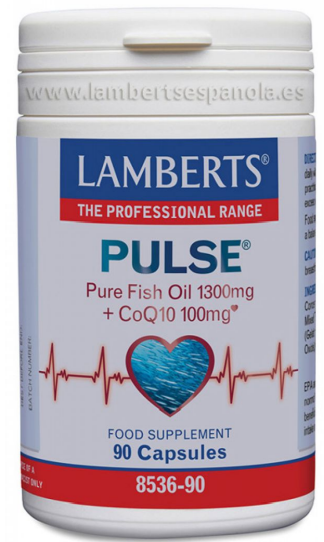

- Concentrated fish oil.
- Provides a total of 1040 mg of Omega 3.
- EPA 715 mg / DHA 286 mg.
- It undergoes a sophisticated purification process.
- It also provides a total of 100 mg of Coenzyme Q10.
- Two-daily formula, allowing for a smaller capsule size.

Black soft capsule.

Press 90 Capsules

EAN: 5055148412425 FABRICANTE: LAMBERTS

Two capsules provide:
