

Pycnogenol 60 Capsules

EAN: 5055148403041 FABRICANTE: LAMBERTS

Pycnogenol® 40 mg is a Maritime Pine Bark Extract. It provides proanthocyanidins known for their significant antioxidant effects.

DESCRIPTION

Pycnogenol® is an extract from the bark of Maritime Pine. Proanthocyanidins, a subgroup of plant compounds from the flavonoid family, are the key component of Pycnogenol®. They are present in high concentrations in red wine, grapes, cocoa, blueberries and apples.

Pycnogenol® was first investigated by Dr. Jack Masquelier of the University of Bordeaux, France, after he read about an unknown substance that had been used successfully by members of an expedition. His research focused on the proanthocyanidins in Pycnogenol®, known for their significant antioxidant effects. In vitro testing showed that Pycnogenol® possesses powerful antioxidant properties similar to those of Vitamins C and E.

Based on the results obtained by Dr. Masquelier of the University of Bordeaux, France, Charles Haimoff developed the process of extracting pine bark and was granted a patent in the United States for the use of Pycnogenol® as a free radical scavenger.

Each capsule of Lambert's® Pycnogenol contains 40 mg in the form of pure natural extract and is manufactured under rigorous GMP manufacturing standards.

Our prehistoric diet provided significant amounts of these PCOs (proanthocyanidins), as they are present in the dark skin of fruits, berries and seeds.

Pink/brown powder in a clear hard capsule.

Each capsule provides:

Pycnogenol	40 mg
(Pine Bark Extract)	

Disintegration time:

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241219
