EAN: 8429007054311

FABRICANTE: LAVIGOR

Cannabisan eye gel is a state-of-the-art gel for the treatment and global care of the eye contour. Cannabisan eye gel has a light texture and an invisible finish. It combines nature and marine biotechnology.

DESCRIPTION

What is cannabisan eye gel and what is it used for?

Cannabisan eye gel is a gel for the eye contour area. Cannabisan eye gel is especially indicated for the treatment and global care of the eye contour, a highly delicate area: fatigue, dryness, congestion, bags, dark circles, sagging, wrinkles and expression lines. It offers, at the same time, a pleasant sensation of rest.

What are the active ingredients of Cannabisan eye gel?

The active ingredients of Cannabisan eye gel are:

- CBD, which is calming and antioxidant.
- Hemp oil: soothing.
- Multifunctional plankton extract of biotechnological origin: repairing, protective, circulatory and lightening.
- Pure and biological hyaluronic acid: moisturizing and repairing.
- Caffeine: decongestant.
- Centella asiatica: restorative and decongestant.
- Vitamins E, C and F: repairing, protective and lightening.

What is the method of use of Cannabisan eye gel?

Cannabisan eye gel is used topically. Apply Cannabisan eye gel around the eyes and then massage with the applicator. From the inside to the outside of the face. Apply in the morning and at night.
