

*Colcurex from Lavigor is a drinkable food supplement with action at the bone and muscle level, and aesthetic action: it helps reduce wrinkles, firms and helps reduce cellulite inflammation.*

### DESCRIPTION

#### What is Colcurex de lavigor and what is it used for?

Colcurex is a food supplement from Lavigor. Colcurex is a food supplement in the form of drinkable vials with action at the bone and muscle level, and triple aesthetic action: it helps reduce wrinkles, firms and helps reduce the inflammation that cellulite causes. In addition, the contribution of collagen peptides at the recommended doses, reinforced with hyaluronic acid and liquid curcumin, leads to greater skin density and better joint health. Turmeric extract works as an antioxidant and anti-inflammatory. Pepper extract increases the bioavailability of curcumin.
