EAN: 8429007041311 FABRICANTE: LAVIGOR

Laviderm bionic complex is a non-greasy facial gel (oil free), suitable for all skin types, capable of increasing cell renewal and providing an important antioxidant and moisturizing effect.

DESCRIPTION

What is Laviderm Bionic Complex and what is it used for?

Laviderm Bionic Complex is a moisturizing gel that serves as a cell renewal treatment, with an antioxidant and moisturizing effect, suitable for all skin types, with the added benefits of alpha and beta hydroxy acids. Laviderm Bionic Complex is ideal for daily care, even for oily and acne-prone skin, or as a pre- and post-chemical peeling product.

What is the composition of Laviderm Bionic Complex?

The composition of Laviderm Bionic Complex is:

- Lactobionic acid: cell renewal, antioxidant and moisturizing.
- Glycolic acid: cell renewal and moisturizing.
- Salicylic acid: cell renewal and sebum regulator.
- Hamamelis water: Astringent and repairing.
- Bisabolol: Calming and softening.
- Vitamin F: Cellular stimulator.
- Ubiquinone: antioxidant.

How is Laviderm Bionic Complex used?

Laviderm Bionic Complex is applied twice a day, morning and night, on clean skin, through a light upward circular massage, until completely absorbed, prior to the recommended daily care anti-aging treatment.
