

Tincture of Propolis 30 ml Bottle with pipette 30 ml

EAN: 8470002008359 FABRICANTE: MARNYS

Water-soluble propolis tincture. 25% propolis concentration, one of the highest on the market.

DESCRIPTION

MARNYS® Propoltint is a **propolis tincture** that is completely soluble in water or any other liquid, with a **concentration of 25% propolis**, making it **one of the highest concentrations on the market**.

Propolis is a natural mixture produced by bees from shoots and plant exudates, which they use to protect the hive from diseases and to seal walls and cells.

Propolis contains **twelve types of flavonoids**, including **Galangin**, Pinocembrin and Catechin, two phenolic acids, Cinnamic and Caffeic, and Resveratrol. The **phenols in Propolis** have **interesting properties** that have been widely researched, especially in relation to their **usefulness in the mouth and throat**.

MARNYS® Propoltint **Propolis** guarantees a minimum of 10 % **flavonoid content expressed in Galangin** , with **high purification** since inactive substances such as wax are eliminated through proprietary technology.

MARNYS® Propoltint Propolis is of high quality, as it is completely soluble, guaranteeing **dissolution in water and easy intake** or rinsing.

Easy dispensing due to its dropper presentation.

Instructions for use

For oral use : dilute 5-10 drops in half a glass of water or juice and take 3 times a day before meals. For higher concentrations, place the drops on bread, honey, etc.

For oral use: dilute 10-25 drops in a glass of water for gargling, rinsing and washing.

Shake well before use.
