

Calbone vitamin D and calcium 60 Tablets

EAN: 8436583690567 FABRICANTE: NATURBITE

Calbone vitamin D and calcium naturbite is indicated in cases of osteoporosis, and to prevent cavities. Calcium is essential for bone formation, calcium deficiency causes rickets, osteoporosis, decalcification and growth retardation on bones.

DESCRIPTION

Calbone vitamin D and calcium naturbite can reduce hip fractures in elderly patients, as well as **osteoporosis**, tooth decay and bone fractures. The absorption of calcium by the small intestine depends on vitamin D. There are studies that affirm that the addition of vitamin D in the diet improves the effects of calcium on bone density and shows a reduction in the risk of **fractures**.
