

Digestive Enzymes and Probiotics 60 Capsules

EAN: 8436583691151 FABRICANTE: NATURBITE

Digestive enzymes break down proteins, carbohydrates and lipids. Probiotics are live, non-pathogenic microorganisms that improve the microbial balance, especially in the gastrointestinal tract.

DESCRIPTION

What are Digestive Enzymes and what are they for?

Digestive enzymes break down proteins, carbohydrates and lipids. They are used to treat digestive disorders, from lactose intolerance to cystic fibrosis. Digestive enzymes differ from each other by the type of enzyme, the source and origin, and the dosage.

What are Probiotics?

Probiotics are live, non-pathogenic microorganisms that improve the microbial balance, especially in the gastrointestinal tract. They consist of the yeast *Saccharomyces boulardii* or lactic bacteria, such as *Lactobacillus* and *Bifidobacterium* species. Probiotics exert their beneficial effects through several mechanisms, such as reducing intestinal pH, decreasing colonization and invasion of pathogenic organisms, and modifying the host immune response.

What is the recommended dose of Naturbite Digestive Enzymes and Probiotics?

It is recommended to take one to three capsules daily, before each meal.
