EAN: 8435110850245    FABRICANTE: NATURLIDER

*Age splendor Sun star Beta-carotene from Naturlider prepares the skin for exposure to the sun, helps to enhance tanning and prolongs it.*

### DESCRIPTION

**Naturlider Age Splendor Sun Star** is a natural **nutricosmetic** that we should take about two months before sun exposure to prepare the skin against oxidative damage from free radicals. So Age Splendor Sun Star from Naturlider will protect our skin from sun exposure, **enhance the skin's tan**, and prolong it. Our skin will look very beautiful.

If we want **to prolong the tan** after sun exposure, we can continue taking Age Splendor Sun Star from Naturlider.

- The main component of this product is carrot powder, which helps prevent sun damage and promotes a healthy tan without burning.
- The presence of vitamin E in the product helps protect skin cells against oxidative damage.
- Thanks to its antioxidant ingredients, this product strengthens the skin's resistance to sun exposure and repairs damage caused by the sun.
- It can be used on all skin types, as it is suitable for each one of them.
- It is recommended to take one capsule a day, preferably during breakfast. It is advisable to start taking it 4 weeks before sun exposure and continue throughout the exposure period.
