EAN: 8435110852140 **FABRICANTE:** NATURLIDER

Chlorella from Naturlider helps regulate intestinal transit naturally. Naturlider chlorella helps us purify the liver since it expels harmful substances from our body.

DESCRIPTION

What is it and what is Chlorella from Naturlider used for?

Chlorella from Naturlider is a natural food supplement that provides nutrients and revitalizes our body. Naturlider chlorella has a laxative effect and a high detoxifying power for the liver.

Chlorella is a single-cell microscopic algae, about the size of a red blood cell and also round. It multiplies very quickly and when it was discovered that chlorella contains at least 40% of its weight in protein, research began on how to turn it into food. It was in 1975 when it was marketed for the first time in food, after patenting a process that broke down the hard cell wall, allowing access to the many nutrients in the cytoplasm.

Various studies agree on the contribution of nutrients to the body and that it contains a broader spectrum of important nutrients than any other known food source.

What are the ingredients of Chlorella from Naturlider?

The Ingredients per capsule of Chlorella Naturlider are:

- Chlorella algae (*Chlorella vulgaris*, Beijerinck) whole plant in fragmented wall powder 500 mg,
- Bulking agent (microcrystalline cellulose),
- Anti-caking agents (magnesium stearate and silicon dioxide),
- Shell (hydroxypropylmethylcellulose).

What is the daily dose of Chlorella Naturlider that I should take?

Chlorella Naturlider must be taken orally. You should take two capsules daily with a glass of water, preferably before meals.
