

LACTOFERRINE NATURLIDER 60 Vcaps

EAN: 8435110851426

FABRICANTE: NATURLIDER

Lactoferrin Naturlider has many properties, it favors the assimilation of iron, it has antibacterial activity, antiviral activity, antifungal and antiparasitic activity, capacity to reinforce the immune system, anti-allergic properties, it is an antioxidant, it favors the formation of healthy intestinal flora, it stimulates tissue regeneration, all these properties due to its content in lactoferrin. Due to its content in Vitamin C, it contributes to the normal functioning of the immune system, helps to reduce tiredness and fatigue and improves the absorption of iron.

DESCRIPTION

Naturlider Lactoferrin is indicated in states of **iron deficiency** such as **anemia**, pregnancy (under medical control), menstrual periods. Lactoferrin favors the absorption of iron.

The bacteriostatic activity of lactoferrin is based on the uptake of iron particles from the environment, which greatly inhibits growth and the expression of virulent factors. The **bactericidal** activity is attributed to the direct interaction of lactoferrin with the outside of the bacteria.

Lactoferrin has potent **antiviral** activity against a large number of viruses that can infect humans and animals including rotavirus, herpesvirus, hepatitis virus, influenza virus, HIV, hantavirus, poliovirus, adenovirus, enterovirus, cytomegalovirus.

Lactoferrin improves the composition of the intestinal flora because it combats pathogenic microbes. Prebiotic bacteria are very insensitive to the action of lactoferrin.
