

PREXIBO NATURLIDER 90 Vcaps

EAN: 8435110851679 FABRICANTE: NATURLIDER

Naturlider Prexibo is a food supplement based on plant extracts that is indicated for the treatment of Bacterial Overgrowth syndrome in the Small Intestine (SIBO). This syndrome has several risk factors, such as diverticulosis of the small intestine, lack or absence of gastric acid, alteration of the motility of the small intestine. They also have nutritional consequences such as fat malabsorption, hypoproteinemia, vitamin B12 deficiency and normal or slightly elevated levels of vitamin K or vitamin B9 due to their production by bacteria.

DESCRIPTION

Prexibo naturlider is a **probiotic** that is indicated for **dyspepsia, flatulence, nausea, bloating and abdominal pain, fatigue, diarrhea and constipation.**

Prexibo naturlider is a food supplement based on plant extracts such as:

Barberry: The entire plant, except the fruits, contains alkaloids (2-3%), among which Berberine stands out. Many of the effects of berberine are explained through enzyme-receptor and cell signaling mechanisms, however there is growing evidence of the importance of the interrelationship, pre- and probiotic type, between berberine and the intestinal microbiota in these effects.

Neem or neem (*Azadirachta indica*), also called margosa or Indian lilac, has been known in India for centuries for its many healing properties. Sometimes called the wonder tree or the village pharmacy tree, neem contains numerous substances with anti-inflammatory, antibacterial or immunostimulant activity. The first medical texts in Sanskrit refer to the beneficial effects of its fruits, grains, oil, leaves, root or bark. Each of them has been used for centuries by Ayurvedic medicine to treat various health problems. In addition, in South America and tropical Africa, its reputation for relieving various disorders is known.

Oregano: Traditionally, properties are attributed as an aperitif, digestive, carminative, choleric, spasmolytic, expectorant, antiseptic of the respiratory tract, general tonic and diuretic. In external use it is considered analgesic, healing, antiseptic and antifungal. In laboratory tests the following activities have been described: antimicrobial, antiviral, antioxidant, insecticide, anticancer, hepatoprotective, antidiabetic, cholinesterase inhibitor, anti-inflammatory and analgesic. The use of this extract to fight against pathogens is explained by its antioxidant properties, its antifungal effect and stimulator of the secretion of bile and enzymes, favoring digestion and preventing the proliferation of fungi in the gastrointestinal tract.

Grapefruit: Grapefruit seed is rich in Vitamin C, bioflavonoids (such as Naringin, Hesperidin, Neohesperidin and Narirutin), which synergistically contribute to the fight against more than 800 types of bacteria (among which are Gram positive and Gram negative). and viruses, a hundred fungi and other unicellular parasites. It can reduce pathogenic organisms in the gastrointestinal tract, especially Candida albicans, Geotrichum, hemolytic Escherichia coli and Helicobacter pylori. It is used as part of the treatment in cases of abnormal intestinal flora, including irritable bowel syndrome and autoimmune diseases, such as ulcerative colitis. and Crohn's disease. Unlike other types of antibiotics used to date, it has a minimal negative impact on beneficial bacteria for the body. At recommended doses, it does not compromise the usual intestinal flora such as lactobacillus and bifidobacterium, producing the growth of the usual intestinal flora while inhibiting the growth of pathogenic flora, it does not create resistance due to its use and it has no side effects.
