NEO is a laboratory of food supplements for both children and adults. Neo products are made from natural ingredients. Laboratorios Neo has different ranges, neopeques, fungineo, miconeo and neo.

DESCRIPTION

Neo is a laboratory that was born in 2010 as a laboratory for food supplements. Neovitalhealth produces a whole range of quality natural products for the whole family.

It is a National company, with international projection, committed to the development of natural solutions to improve people's health.

Neo peques is the widest range of natural children's products on the market. They are natural solutions for the little ones in the family based on plants, vitamins, trace elements and other nutrients. They do not contain alcohol or added sugars. Most syrups do not cause cavities and are suitable for diabetics. They are suitable for celiacs and intolerant to milk and dairy products.

The **Neo** range are complete and balanced formulas based on medicinal plants, trace elements and other nutrients, ideal for improving and solving different health circumstances in adults. Most neo presentations present their assets in a state-of-the-art galenic (Neo Microgranule) that allows comfortable and simple guidelines of 1 or 2 capsules a day. The Neo brand also includes a line of jellies with personalized formulas by age and sex, a line of fast-acting sprays, a line of syrups and a line of liquid capsules.

The **Reishi Neo** line is of integrative mycotherapy, that is to say: Mycotherapy, phytotherapy and galenic in microgranules. They are exclusive formulations that contain standardized pure extracts of organic mushrooms that allow to provide active ingredients in an unaltered way. We add to mycotherapy, the synergy of phytotherapy due to its proven curative properties, to give people the most appropriate solution to their health needs and circumstances, achieving a full effect on cellular memory and the organism.
