

Prostzin Neo 45 Capsules

EAN: 8436036590420 FABRICANTE: NEO

Prostzin Neo is a food supplement for the care of the prostate.

DESCRIPTION

What is Prostzine Neo? Benign Prostatic Hyperplasia (BPH) is a non-cancerous enlargement of the prostate, a male gland. It can affect men of different ages, but it is more common in the mature stage due to hormonal changes and the increase of dihydrotestosterone in the prostate receptors. Symptoms of BPH include dribbling at the end of urination, a feeling that the bladder is not completely empty, incontinence, painful urination, or sudden urgency. The Prostzin Neo product acts as a complement to reduce the symptoms associated with BPH. It contains pumpkin and zinc in its composition. Several clinical studies have demonstrated the efficacy of sterols extracted from pumpkin seeds (*Curcubita maxima Duch*) in significantly reducing dihydrotestosterone levels in prostate tissue. This improves the symptoms related to Benign Prostatic Hyperplasia. Zinc, for its part, provides a synergistic effect, since it inhibits the enzyme 5-alpha-reductase, which converts testosterone into dihydrotestosterone. In addition, in case of prostatitis, zinc favors the immune function of the prostate gland. What are the ingredients of Prostzin Neo? Pumpkin dry extract (*Cucurbita maxima Duch*) standardized to 0.4% in -sitosterol: 300 mg Zinc gluconate 43.7 mg. Other Ingredients: Sweeteners (xylitol 53 mg and mannitol 53 mg); Carrier (polyvinylpyrrolidone) 45 mg; Bulking agent (talc) 5 mg; Wrap (gelatin) 98 mg. What is the recommended daily dose of Prostzin neo? Take 2 capsules a day, one at breakfast and one at dinner, for 30 days. As maintenance, take 1 capsule a day, at breakfast, for 2-3 months.
