

Lactoferrin 60 Caps

EAN: 8436532901836 FABRICANTE: NPRO

Purified lactoferrin, immune system booster and mucosa protector. Ingredients certified lactose-free and grass-fed.

DESCRIPTION

NPro LACTOFERRINA contains purified lactoferrin, a multifunctional protein naturally present in colostrum, secretions and mucous membranes.

Its high affinity for iron makes it a competitor with pathogenic bacteria that require iron to proliferate. Essential for the proper functioning of the innate and acquired immune system.

It also promotes the integrity of the mucous membranes and helps us prevent and reverse local and systemic inflammatory processes. Endogenous lactoferrin production decreases with age, and its necessary replacement makes it an ideal multifunctional nutraceutical ingredient to combat the stress that our current lifestyle poses to our immune system.

What is NPRO Lactoferrin used for?

Recommended for people with compromised immune systems: the elderly, children, people with eating disorders, anemia, antibiotic resistance, biofilm.

Restoration and protection of the intestinal barrier and its mucous membranes, stimulating the proliferation of Lactobacilli and Bifidobacteria. For complementary and preventive use in viral, bacterial and fungal gastrointestinal infectious diseases: flu, laryngitis, ulcerations, gastritis, Helicobacter Pylori, hepatitis B and C, candidiasis, oral dysbiosis, childhood sepsis, diarrhea.

Instructions for use

1 to 2 capsules per day or as prescribed by a professional. Take during or after meals.
