

## NPro Butibifidusbiota 60 Vegetable Capsules

EAN: 8436532900952    FABRICANTE: NPRO

*NPro BUTIBIFIDUSbiota is indicated as an adjuvant treatment for inflammatory bowel diseases: irritable bowel syndrome, Crohn's and ulcerative colitis; in the reduction of intestinal hypermeability and in the prevention of disorders related to a low-fiber diet: Constipation and slow intestinal transit, diverticulosis, obesity, cardiovascular diseases, diabetes and colon cancer.*

### DESCRIPTION

#### What is NPro Butibifidusbiota?

NPro BUTIBIFIDUSbiota is a food supplement that serves to provide colonocytes with its main energy metabolite, SCFA (short chain fatty acid) Butyrate. Correct levels of butyric acid are of great value for the integrity and functionality of the colon, as well as for intestinal homeostasis. Its butyric acid content is achieved through the contribution of microencapsulated butyrate triglycerides for colonic release and 5 different types of bifidobacteria, precursors of short-chain fatty acids and an exogenous form of butyric acid contribution.

NPro BUTIBIFIDUSbiota is compatible with SIBO, FODMAP and low-histamine diets.

#### What is the composition of NPro Butibifidusbiota?

Dosage per 2 capsules

Microencapsulated tributyrin (30% butyrate triglycerides) 1,000 mg.

Probiotic bacteria mix (20 billion CFU\*) 20 x 10<sup>9</sup> CFU:

- Bifidobacterium infantis - CCFM689 7 x 10<sup>9</sup> CFU.
- Bifidobacterium lactis - BL03 5 x 10<sup>9</sup> CFU.
- Bifidobacterium longum - YS108R 4 x 10<sup>9</sup> CFU.
- Bifidobacterium bifidum - CCFM1063 2 x 10<sup>9</sup> CFU.
- Bifidobacterium adolescentis - CCFM1173 2 x 10<sup>9</sup> CFU.

DRCaps® Vegetable Capsule

\*Colony forming units

#### What is the recommended daily dose?

Take 1 to 2 capsules preferably before meals.
