

NPro Motilintest 60 Capsules

EAN: 8436532901881 FABRICANTE: NPRO

NPro MOTILintest is a prokinetic with activity in cases of constipation due to high intestinal motility and that stimulates the evacuation of microorganisms and toxins as a consequence of bacterial and/or fungal overgrowths.

DESCRIPTION

What is NPro Motilintest?

NPRO Motilintest improves the functionality of the Migratory Motor System (MMS), stimulating the neurotransmitters involved in the Enteric Nervous System (ENS) and Central Nervous System (CNS), as well as its mediator the Autonomous Nervous System (ANS). The formulation is completed by the probiotic strains *Bifidobacterium bifidus* CCFM1167 and *Bacillus coagulans* NJ23, the prokinetic compound Prodigest®, magnesium bisglycinate, vitamin B6 and the bile inducers: boldo and fennel.

What is NPro Motilintest for?

Useful in chronic constipation due to low intestinal motility, irritable bowel syndrome (IBS E) and bacterial overgrowths (where the low activity of the migratory motor system makes it difficult to expel pathogenic elements from the intestinal tract, which can lead to abdominal distention, gas, flatulence, diarrhea, as well as chronic dysbiosis or intestinal hyperpermeability).

Cholagogue and cholaretic stimulant of biliary function. Reduces nausea and the response of the vomiting center due to its antiemetic activity.

What is the composition of NPro Motilintest?

COMPOSITION: for 2 capsules

- N-Acetyl L-Carnitine 240 mg.
- Griffonia ES (20% 5-HTP) 200 mg.
