It is formulated in the form of triglyceride so that the body assimilates it better. The oil does not oxidize, it contains natural vitamin E and it does not contain gluten, lactose or soy.

DESCRIPTION

What is NUADHA 1000 from NUA Laboratories?

NUADHA from Nua laboratories is a food supplement rich in DHA (docosahexaenoic acid), a marine omega-3 fatty acid present mainly in oily fish (in this case, anchovy) that provides a minimum of 1,000 mg of pure DHA per pearl.

What is NUADHA 1000 from NUA laboratories used for?

DHA serves to form the cell membrane of each of the cells in our body, therefore it is very important and although we can consume it with oily fish, the amount ingested with food is not enough. DHA is very important in the brain, the retina of our eyes and the sperm of men.

What uses does NUADHA uses from NUA laboratories?

NUADHA is recommended for both children and adults to strengthen memory and contribute to a normal cognitive level. Another of its uses is for vision, especially in cases of visual impairment associated with age. At the cardiovascular level, it helps to lower cholesterol levels and maintain normal heart function. And it is also used to strengthen sperm and thus improve male fertility.

What are the benefits of NUADHA 1000 from Nua laboratories?

NUADHA has great benefits, such as supporting cognitive function, helping to concentrate and memorize, making it effective for memory in both children and adults. DHA also has visual benefits, since a significant percentage of the fat in the macula is DHA. It can be used in both children and adults. DHA also has a great benefit in male fertility, because DHA strengthens the structure of the sperm. At the cardiovascular level, it contributes to maintaining cholesterol levels at normal levels.
