DESCRIPTION

What is NUA Laboratories DHA?

We find DHA in all the cells of our body, forming the cell membrane that delimits the contour of said cells, but it is preferably concentrated in three areas of our body: in the brain, in the retina of the eye and in the sperm of men .

What is the use of DHA from NUA laboratories?

DHA is used to strengthen vision, both in children and adults, to contribute to normal brain function, to the proper functioning of the cardiovascular system and to the quality of sperm in men.

What uses does DHA from NUA laboratories have?

DHA is used visually because it contributes to visual development in the case of children and in the case of the elderly it is used to maintain normal vision and in situations of visual impairment. DHA is also used to regulate blood cholesterol levels, as DHA contributes to the normal functioning of the cardiovascular system. And, on the other hand, it is important for men if they want to have intact sperm, because DHA is a very important fatty acid for the normal functioning of the sperm.

What are the benefits of DHA from NUA laboratories?

The benefits of DHA are normal function of the cardiovascular system, normal function of the brain and optimal sperm integrity. How is DHA from NUA laboratories taken? DHA is taken orally, 1 or 2 capsules a day, with meals.

What are the ingredients of DHA from NUA laboratories?

The ingredients of DHA DE NUA are: purified fish oil; Other Ingredients: Antioxidants (Natural Mixed Tocopherols). Capsule composition: gelatin, glycerin and water. Omega 3 460mg per pearl, DHA 400mg per pearl, Natural Vitamin E 4.25mg per pearl.
