DESCRIPTION

What is NUADHA vision of NUA laboratories?

NUADHA vision is a food supplement rich in DHA and vitamins specially formulated for vision problems.

What is NUADHA vision of NUA laboratories for?

The NUADHA vision is used to maintain vision in normal conditions. To support visual function in case of Age-Related Macular Degeneration (AMD), Glaucoma or Diabetic Retinopathy and to support visual function in cases of Dry Eye.

What uses does NUADHA vision of NUA laboratories have?

NUADHA vision is used for the **maintenance of vision in normal conditions**, to strengthen the visual system for seasons, as a preventive investment in your visual health. In these cases, the recommended dose is: alternate on different days taking 1 capsule of Preparation A (at the beginning of breakfast) and taking 1 pearl of preparation B (during or after breakfast) (e.g. Monday-Preparation A, Tuesday-Ready B, Wednesday-Ready A. etc.).

Another of its uses is in age-related **macular degeneration**: It is one of the most common visual problems associated with age. AMD is an eye disease caused by damage or deterioration of the macula. Of all the retina, the macula, located in the center of it, is responsible for us seeing clearly and being able to discern fine and precise details. In case of age-related macular degeneration, the recommended dose is: take 1 capsule of Preparation A (at the beginning of breakfast) and 1 pearl of Preparation B (during or after breakfast).

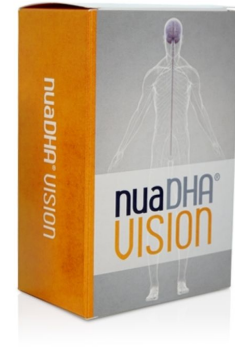

NUADHA vision is also used in the case of **Glaucoma**: glaucoma is the second cause of blindness worldwide after cataracts. This problem is due to damage to the optic nerve, which is responsible for conducting visual information to the brain. In case of glaucoma, the recommended dose is: take 1 capsule of Preparation A (at the beginning of breakfast) and 1 pearl of Preparation B (during or after breakfast).

NUADHA VISION 30 + 30

EAN: 8437009953389 FABRICANTE: NUA

And NUADHA vision is also indicated in **diabetic retinopathy**: visual disease that affects the retina due to high blood sugar levels. Recommended dose: take 1 capsule of Preparation A (at the beginning of breakfast) and 1 pearl of Preparation B (during or after breakfast).

Another no less important use of NUADHA vision is to support visual function in cases of **dry eye**. Dry eye or keratoconjunctivitis appears associated with age, in women from the climacteric and in people who wear contact lenses. Likewise, it is increasingly common in users of computers, tablets, etc. due to decreased blink rate. The origin of dry eye lies in part in altered secretions by the visual lacrimal glands located in the eyelids and therefore leave the cornea 'drier'. Its non-treatment can lead to ulcers and serious inflammation of the cornea that can distort vision. Recommended dose: take 1 capsule of Preparation A (at the beginning of breakfast) and 1 pearl of Preparation B (during or after breakfast).

What are the benefits of NUADHA vision from NUA laboratories?

The benefits of NUADHA vision is that it is a visual formula that provides a visual antioxidant mixture (Preparation A) and a high concentration of DHA (Preparation B), which what they do is nourish and protect the visual system in healthy adults or with visual alterations. or with a family history of macular degeneration, glaucoma, diabetic retinopathy... Its antioxidant formula based on nutrients such as lutein, taurine zeaxanthin or ac. lipoico, nourish and protect the entire visual system (cornea, retina and optic nerve). Its contribution in DHA nourishes the cornea and retina. To prevent, you can alternate taking both preparations on different days.

How to take NUADHA vision from NUA laboratories?

NUADHA vision is taken orally: Recommended daily amount: 1 capsule of Preparation A before a meal and 1 pearl of Preparation B during or at the end of a meal. Optionally, you can alternate taking preparations A and B on different days. In some cases, it may be necessary to increase the supply of DHA, in which case, it would be done through the additional intake of NuaDHA 1000.

What are the ingredients of NUADHA vision from NUA laboratories?

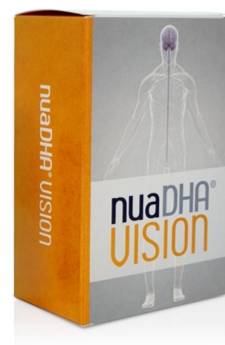

Preparation A contains: L-ascorbic acid (Vitamin C), Taurine, Zinc Gluconate, R-Lipoic Acid, Lutein, D-alpha Tocopheryl Acid Succinate (Vitamin E), Zeaxanthin, anti-caking agent (magnesium stearate), Cupric Gluconate and anti-caking agent (silicon dioxide). Capsule composition: coating agent (hydroxypropylmethyl cellulose), colorants (titanium dioxide, yellow iron oxide and red iron oxide). Preparation B contains: NuaDHA (purified fish oil rich in DHA), natural mixed tocopherols (Vitamin E). Pearl composition: coating agent (gelatin) and humectant (glycerol)
