

MANGOSTAN C 20 VIALS

EAN: 8436608681129 FABRICANTE: PHYTOVIT

Mangostan C From Phytovit is a food supplement with antioxidant properties that improves inflammatory processes.

DESCRIPTION

The antioxidants and anti-inflammatory properties of mangosteen make it a valuable weapon in the fight against chronic diseases. Research has proven the value of consuming them to combat the damage of free radicals that occur at the cellular level, aging and even some degenerative diseases due to the antioxidant, anti-inflammatory and antithrombotic effects, which reside mainly in the so-called xanthenes contained in the mangosteen.

It is currently known that there are more than 200 xanthenes in nature, of which about 50 are found in this Asian fruit. Antioxidant Properties of Mangosteen Antioxidants fight free radicals that are known to cause oxidative stress and damage at the cellular level.

The antioxidant properties of mangosteen have even been studied to uncover thermodynamics in order to evaluate its free radical scavenging capacity. Only a few tropical plants have been found to help in this function, including the mangosteen.

Mangosteen (*garcinia mangostala L*) is a tropical fruit, which is becoming known as 'the fruit of health'. It is postulated as a fruit that provides great benefits to our body, being able to obtain great anti-inflammatory and antioxidant properties due to the functions that xanthone exerts in our body.

What is mangosteen from phitovit used for?

Applications:

Antioxidant, anti-inflammatory, antibiotic and antithrombotic.
