Address: C/ Sant Martí de l'Erm, 1 3^o1^a

Postal Code / District: 08960

Town: Sant Just Desvern

Province:

Phone: +34. 93 371 92 82

Foundation year: 1991

Country: ES

Web: <https://www.pileje.es/>

Pileje is a laboratory that focuses on probiotics to correct imbalances in the body responsible for numerous functional disorders.

DESCRIPTION

Laboratorios **Pileje** was created in 1991. Pileje focuses on the intestinal flora. Pileje initiates a whole research work in order to find out the probiotic strains to know the effects they have on health. The number one product of Pileje laboratories is **Lactibiane**.

Over the years, Pileje began to study the influence of micronutrients on human health. The essential micronutrients studied by Pileje are vitamins, minerals, trace elements, essential fatty acids. Pileje studies how to improve deficiencies and how to improve the patient's micronutritional situation.

Pileje studies the influence of micronutrients in three areas: **microbiota, micronutrition and phytotherapy**.

Pileje at the **microbiota** level, study probiotics, research and select strains according to each need. The microbiota, are the bacteria, fungi, viruses that are present in the human body. We are talking about nasal, oral, intestinal, vaginal microbiota...

Regarding **micronutrition**, Pileje studies how micronutrients influence health. Pileje is committed to micronutrition to prevent the onset of disorders or diseases, or if the disease has already arisen, Pileje is committed to the microbiota to improve medical treatment.

Pileje bets on **phytotherapy** intervening in all the stages of the plants. According to Pileje, the quality of a plant extract begins with the quality of the raw material, which is influenced by the selection of the plant and specifically of its species, the choice of the cultivation method to be used, in which season of the year it is going to be cultivated and when it is going to be harvested, all this until obtaining the extract and the final product.

Pileje's goal is to promote people's health and making it last as long as possible.
