EAN: 3701145600670 FABRICANTE: PILEJE

Chronobiane is a melatonin from Pileje laboratories, which is indicated to fall asleep. Melatonin plays an important role in sleep. Also Chronobiane de Pileje helps to fall asleep or to sleep in cases of time difference from one country to another.

DESCRIPTION

Chronobiane is a food supplement from **Pileje** laboratories. Pileje Chronobiane helps to **sleep**, to reduce the time to **fall asleep**. Pileje's Chronobiane also lessens the effect of time change, for example, on a jet lag trip.

Melatonin is a natural hormone that is produced by the pineal gland when there is no light. When melatonin is secreted, the pineal gland is responsible for informing the brain that there is no light and that it is time to sleep. From four in the morning the synthesis of melatonin decreases to start waking up. There are people who have difficulty because this cycle does not work properly, but it can be redirected by reinforcing it with melatonin in the form of a food supplement, such as Pileje's Chronobiane.

Chronobiane Pileje precautions: Do not administer to children or adolescents without medical advice. It is not recommended for pregnant or lactating women, people suffering from inflammatory or autoimmune diseases, epileptics, asthmatics and people suffering from mood, behavior or personality disorders.
