EAN: 3701145600595    FABRICANTE: PILEJE

*Duoliver Plus is from Pileje laboratories, it is indicated in functional digestive disorders of hepatic origin. Pileje Duoliver Plus and contributes to the detoxification of the liver and gallbladder.*

### DESCRIPTION

**Duoliver Plus** is a food supplement from **Pileje**. Duoliver Plus is mainly composed of milk thistle and silymarin, responsible for its **hepatoprotective function, detoxifying the liver and gallbladder**.

Milk thistle is the quintessential liver plant. Its fruit contains silybin, silicristine and silidianin, three substances that form a hepatoprotective complex known as silymarin. Silymarin acts directly on liver cells, regenerates them and combats hepatotoxic substances, such as alcohol or other food-borne toxins. Milk thistle favors the secretion of the gallbladder, so it is recommended in case of liver failure or gallstones.

**Duoliver Plus Pileje ingredients:** S-adenosyl-L-methionine disulfate p-toluene sulfonate, Silymarin phytosome® (soy lecithin, Milk Thistle extract (*Silybum marianum* L. Gaertn.) titrated in silymarin), anti-caking agents: fatty acids, magnesium oxide, talc, silicon dioxide, magnesium salts of fatty acids and cross-linked sodium carboxymethylcellulose, bulking agents: microcrystalline cellulose and mannitol, vitamin E (DL-alpha-tocopheryl acetate), glazing agents: polyvinylpyrrolidone, ethylcellulose and hydroxypropylcellulose, colorant: iron oxide and iron hydroxide.
