DESCRIPTION

What is Quercetin and Luteolin from Prisma natural and what is it for?

Quercetin is a water soluble bioflavonoid that is part of the group of non-citrus pigments called bioflavonoids. These nutrients are essential to support the antioxidant action of vitamin C, which allows them to combat free radicals and effectively strengthen the structure of veins and capillaries.

Luteolin is a flavonoid with antioxidant properties that helps protect the human body against free radicals and oxidative stress. Additionally, this substance has anti-inflammatory properties that help protect body tissues against inflammation.

How should I take Quercetin and Luteolin from Prisma natural?

You should take two to three vegetable capsules a day, before main meals.

What is the composition of Quercetin and Luteolin from Prisma natural?

- Quercetin 750mg
- Luteolin 98% 150mg
- Anti-caking agents (Magnesium Stearate and Silicon Dioxide)
- Vegetable capsule (Glazing Agent (Hydroxypropylmethylcellulose)).
