

Nocisens 50ml

EAN: 8437020862011 FABRICANTE: PROSPERA BIOTECH

Nocisens is a cream for the care of sensitive and atopic skin, concentrated and with a smooth texture. Nocisens relieves itching and dryness of atopic skin.

DESCRIPTION

IMPORTANT: Discontinued product. It is replaced by Nocisens Intense. Link at the bottom of the page.

What is Nocisens and what is it for?

Nocisens is a concentrated cream with a smooth texture that acts on the neurosensory system of the skin, strengthening the skin and improving the uncomfortable sensations typical of sensitive and atopic-prone skin, such as dryness and itching.

How many times a day should I apply Nocisens?

You should apply Nocisens twice a day continuously over time so that your skin can regain balance and thus prevent dryness and itchiness from reappearing. Gently massage the cream into the area to be treated until the skin has completely absorbed the cream. In case you feel discomfort due to dry skin, you can increase the frequency and apply the product 3 to 4 times a day.

What are the properties of Nocisens?

The properties of Nocisens are:

- Relieves itching.
- Moisturizes and nourishes the skin.
- Flexibility and elasticity of the skin.

What is the composition of Nocisens Cream?

- Caprylic/Capric Triglyceride
- Glyceryl Behenate
- glyceryl stearate
