

Iron and vitamins with herbal extracts and concentrated juices. Floradix is suitable for women, including pregnant and lactating mothers, children, adolescents, the elderly, convalescents, and vegetarians.

DESCRIPTION

What is Floradix and what is it used for?

Floradix is a food supplement based on iron and vitamins with herbal extracts and concentrated juices that is used to supply iron and nutrients that our body needs in times of **decline** and **spring fatigue**.

Floradix contains a form of iron called ferrous gluconate, which is an iron salt easily absorbed by our bodies. This form of organic iron (II) is especially effective for absorption. In addition, Floradix also contains vitamins B2, B6, B12 and C. These vitamins play an important role in our body by reducing feelings of tiredness and fatigue, and also contribute to normal energy metabolism.

Iron is an essential mineral for the normal production of red blood cells and hemoglobin, both of which are important for transporting oxygen throughout the body. On the other hand, the vitamin C present in Floradix has the ability to improve the absorption of iron that is not in the form of hemoglobin. This means that vitamin C helps our bodies make better use of iron and use it efficiently.

Who can take Floradix?

Floradix is especially recommended for women, including those who are pregnant or lactating. It is also suitable for children, adolescents, seniors, those in recovery, vegetarians, and those who lead an active lifestyle.

It contains essential nutrients such as iron, vitamins B2, B6, B12 and C, which are important to maintain proper body function at these stages of life and in specific situations.

What are the ingredients of Floradix?

Aqueous extract (54%) of: carrot (*Daucus carota*), nettle leaves (*Urtica dioica*), spinach leaves (*Spinacia oleracea*), grass root (*Agrupyrion repens*), fennel fruits (*Foeniculum vulgare*), seaweed (*Macrocystis pyrifera*), hibiscus flowers (*Hibiscus sabdariffa*).

Mixed fruit juice concentrates (29.4%): pear (*Pyrus communis*), grape (*Vitis vinifera*), blackcurrant (
