At Santiveri, we know that the path to your well-being involves taking care of a healthy diet. For this reason, our Dextrin lino Santiveri bread is made with the utmost rigor and with top quality ingredients, such as natural sourdough of 100% whole grain flour, extra virgin olive oil and flax seeds (9%).

Furthermore, to make our Dextrin flax bread recipe we let the dough take its natural time: we opted for a long and slow fermentation, as we have been doing all our lives. Thanks to the double baking process, these vegan flax bread toasts not only facilitate digestion by converting starch into simple sugars or dextrins, but they will surprise you with a crunchier texture, authentic flavor and perfect thickness.

Since 1885, our family business has innovated and cared about health care and nutrition so that the best nutrients are available to everyone and positively impact their daily lives.

What are the benefits of our flax bread? They are a vegan and nutritious alternative to provide your breakfasts, meals or snacks with a high content of fiber and Omega-3 protein. And by not containing added sugars and having a low content of saturated fats, you will maintain a balanced diet that contributes to your overall well-being.
