

Cran Flora 60 Vegetable Capsules

EAN: 033984314054

FABRICANTE: SOLGAR

Specialized formula containing highly concentrated cranberry extract, along with the probiotic strain Lactobacillus acidophilus and vitamin C, in the patented Ester C form, for immune support.

DESCRIPTION

The cranberry is the fruit of a group of shrubs of the Vaccinium genus, and is characterized by being a fruit that, once ripe, has an intense red color thanks to its polyphenol content, which perform protective functions for the plant. Among them, proanthocyanidins (PACs) stand out.

Two Solgar Cran Flora capsules contain 800 mg of a highly concentrated cranberry extract equivalent to 40 g of fresh cranberry. It also contains the probiotic strain Lactobacillus acidophilus La-14®, a beneficial probiotic strain found naturally in the digestive tract, and 200 mg of vitamin C in the form of Ester C, an enhanced, patented form of non-acidic vitamin C that is gentler on the stomach and remains inside cells for up to 24 hours.

A unique combination of blueberry, probiotic and vitamin C that supports our defenses.

Indications

- People looking for a highly concentrated cranberry product.
- People looking for a product that helps their defenses.

Benefits

- With concentrated cranberry extract.
- With probiotic.
- With vitamin C, which contributes to the normal functioning of the immune system.
