

Vitamin D3 2200 IU 55 mcg 50 Vegetable Capsules

EAN: 033984033160

FABRICANTE: SOLGAR

Supports the normal functioning of the immune system and bone maintenance.

DESCRIPTION

Vitamin D is known as the "sunshine vitamin" because the body needs direct exposure to sunlight for its endogenous synthesis. Therefore, in months with fewer hours of light or in skin protected from sun exposure, its natural synthesis is reduced.

Vitamin D is involved in numerous processes, such as the normal functioning of the immune system, the maintenance of bones and teeth, calcium absorption and muscle function.

Solgar® Vitamin D3 2200 IU is a powdered formula of vitamin D3 that comes in capsule form and is derived from lanolin. With 2200 IU of vitamin D3 per capsule, it may be suitable for those who wish to improve or maintain their vitamin D levels.

Solgar® offers a wide range of vitamin D3 products to help consumers choose the product that best suits their needs.

Indications

- People who want to maintain or optimize their vitamin D levels.
- People who want to support the health of their musculoskeletal system.
- People who want to support the normal functioning of their immune system.
