

Vitamin D3 400 IU 10 mcg 100 Pearls

EAN: 033984033207

FABRICANTE: SOLGAR

400 IU of high-quality vitamin D3, the form best processed by the body. Supports normal immune system function and bone maintenance.

DESCRIPTION

Vitamin D is known as the “sunshine vitamin” because the body needs direct exposure to sunlight for its endogenous synthesis. Therefore, in months with fewer hours of light or in skin protected from sun exposure, its natural synthesis is reduced.

Vitamin D is involved in numerous processes, such as the normal functioning of the immune system, the maintenance of bones and teeth, calcium absorption and muscle function.

Solgar® Vitamin D3 400 IU is a liquid formula of vitamin D3 that comes in softgel form and is derived from fish liver oil. With 400 IU of vitamin D3 per capsule, it may be suitable for those with lower requirements or who, due to individual circumstances, are unable to take high doses of vitamin D.

Solgar® offers a wide range of vitamin D3 products to help consumers choose the product that best suits their needs.

Indications

- People who want to maintain their vitamin D levels.
- People who want to support the health of their musculoskeletal system.
