DESCRIPTION

What is Probinerv from Soria Natural and what is it used for?

Probinerv is a food supplement from Soria Natural made with Inulin and Cerebiome. Cerebiome is a proprietary blend of two probiotic strains: Lactobacillus helveticus Rossel®-52 and Bifidobacterium longum Rossel®-175.

Probinerv is used for states of anxiety, to relieve the psychological and physical symptoms that anxiety produces.

Probinerv is also very effective in balancing mood.

What is the composition of Porbinerv de Soria Natural?

The composition of Probinerv de Soria natural is:

Cerebiome (Lactobacillus helveticus, Bifidobacterium longum), inulin, anti-caking agent: silicon dioxide and magnesium salts of fatty acids, capsule (hydroxypropylmethylcellulose).

Probinerv is a gluten-free product, therefore suitable for people with celiac disease or gluten intolerance.

How do you take Probinerv from Soria Natural?

Probinerv is taken orally: One capsule should be taken daily, with a glass of water. It is advised not to take it with hot liquids.
