

## ARTICHOKE 500 mg. Comp. 500U

EAN: 8427483090632    FABRICANTE: SOTYA

*The artichoke is used as a diuretic in the case of fluid retention and to detoxify the liver. It is also very effective in the case of constipation.*

### DESCRIPTION

The **artichoke** or *Cynara scolymus* is recommended in the case of **fatty liver** as it detoxifies due to its **choleretic** action, that is, it increases bile secretion. This increase in **bile secretion** is due to cynarin, a bitter and aromatic substance present in the artichoke flower.

The artichoke is also **diuretic** and that is why it is widely used to reduce **fluid retention**.
