

## Sucralin 150 tablets

EAN: 8437011498021

FABRICANTE: SUCRALIN

*Sucralin is a non-caloric sweetener that replaces sugar and therefore helps reduce the caloric intake of foods and drinks in weight loss diets.*

### DESCRIPTION

Sucralin is an excellent sweetener to reduce the calories of sugar without sacrificing its flavor.

Diabetics can consume it safely because, as it is not absorbed, the body does not use it to obtain energy and therefore it does not intervene in the production of insulin or alter blood glucose levels.

Sucralin does not include ingredients that contain gluten or grains derived from cereals with gluten because the maltodextrin used comes from corn starch, a cereal that does not contain gluten, making it a perfectly suitable product for people with celiac disease.

Sucralin from Sucralose does NOT contain Phenylalanine, making it a product suitable for phenylketonurics.

Sucralose is suitable for everyone, even during physiological situations of pregnancy or breastfeeding. Although sucralose can be used as part of a balanced diet, pregnant or breastfeeding women are advised to consult their doctor or nutritionist, since during these stages energy requirements are increased and an evaluation by a specialist will be necessary to determine, based on the person's weight, whether it is appropriate to increase or reduce caloric intake.

### Characteristics

- Practical presentation to carry in your bag.
- It dissolves in a few seconds both cold and hot.
- It does not provide calories.
- It does not contain phenylalanine so it is suitable for phenylketonurics.
- Suitable for pregnant or breastfeeding women.
- Suitable for children with diabetes or overweight.
- Ideal for weight control diets.
- It does not cause cavities.
- It should be kept tightly closed and in a dry place.
- Suitable for diabetics.
- It does not contain gluten.
