TA-65 is an all-natural plant-based compound that may help maintain or rebuild telomeres, which shorten as people age. Short telomeres have been associated with aging and cellular dysfunction. For a body to stay healthy, it's important to maintain telomere length. Having short telomeres can speed up the natural aging process at the cellular level.

DESCRIPTION

TS SCIENCE makes wellness products based on addressing telomere shortening. TS SCIENCE is focused on anti-aging medicine. Telomeres are a part of the human cell that affect how they age. Without the protection of telomeres our cells age and die.
