Taxon is a research laboratory dedicated to biological medicine. Pata Taxon, no two patients are the same, so the same disease occurs differently in one patient or another. Therefore, Taxon seeks to find the true causes of the disease and puts individual solutions, that is, a solution for each individual.

DESCRIPTION

Taxon has been working since 2001, treating the patient, not the disease, and offering you individual solutions. Taxon is dedicated to biological medicine. Taxon does not go to the symptoms of the disease but to the causes, which are complex because they bring together personality factors, emotions, personal circumstances, genetic factors and epigenetic factors.
