Web: <https://www.teelmask.eu/>

Teelmask masks filter at least 95% of the particles in the air, in addition to having high breathability due to the mechanical and electrostatic action of their composition.

DESCRIPTION

Teelmask masks are FFP2 NR approved. For greater protection they have 4 layers, 2 of Spunbond, one of Spunlace and a Meltblown filter, which increases its coverage and resistance while softening its touch for a better sensation in contact with the skin. Being manufactured by us in Spain, we can guarantee that all quality and safety standards are met in its manufacturing and packaging process. Teelmask has manufactured both ffp2 masks and surgical masks for the COVID pandemic. Teelmask masks comply with all certifications, they have been manufactured for protection against COVID 19 following the WHO recommendations and in accordance with the specifications indicated by the EN 14683: 2019 + AC: 2019 standard.
