

## VB Ter Stonebreaker 20 Vials

EAN: 8429007005511    FABRICANTE: TEGOR

*VB-Ter is a dietary supplement formulated with plant-based ingredients with a purifying effect, which reduce the risk of alterations in the urinary and biliary tracts.*

### DESCRIPTION

#### What is VB Tregor used for?

To reduce the risk of disorders in the urinary and biliary tracts.

Lithiasis is the appearance of calculi, colloquially called "stones", in a liquid medium. The stones are formed by precipitation or concretion of substances that are normally dissolved. In general:

- The most common urinary tract stones are calcium stones, as well as cystine, uric acid and oxalate stones.
- The most common gallstones are cholesterol and also bilirubin.

They are very problematic when they block ducts and give rise to painful colic. Preventing these from occurring is the best way to promote kidney and liver health.

#### What does VB Tregor contain?

VB-Ter incorporates plant extracts in its formulation.

- Ascophyllum, sarsaparilla, dandelion and sandwort. They are known for their diuretic properties. They facilitate the elimination of urea, uric acid and other types of organic waste that may be precipitated in the urine.
- Boldo, fumitory and black radish. They are distinguished by their marked character as liver and bile tonics.

The combination of all of them contributes to kidney and liver well-being. On the one hand, by stimulating the formation of urine; and on the other hand by stimulating the formation and expulsion of bile. All of this promotes the process of eliminating toxic substances that alter their proper functioning.

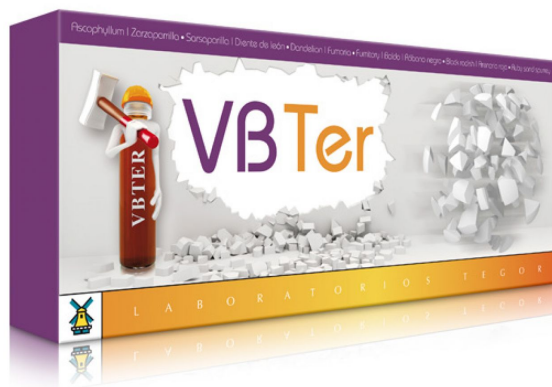

#### What is the composition of VB Tregor?

- Ascophyllum ( *Ascophyllum nodosum* , fluid extract), 0.375 ml;
- Sarsaparilla ( *Smilax officinalis* , fluid extract), 0.375 ml;
