

## Igneaderm Cold Hands and Feet Cream 50 ml

EAN: 8436553164258    FABRICANTE: TERPENIC

*Igneaderm is a cream recommended for people with a tendency to have cold hands and feet, and for low temperatures, acting as a peripheral vasodilator. Therefore, it is not a cream intended to cause an intense heat effect, but rather to act on the area, calming it, hydrating it, providing a sensation of light heat and a vasodilator action. On the other hand, the sensitivity of the thermoreceptors must also be taken into account, which can vary for each person, noting to a greater or lesser degree the rubefacient sensation*

### DESCRIPTION

#### What is Igneaderm from Terpenic and what is it for?

Igneaderm is a cream that contains 100% pure and natural active ingredients, with a pleasant aroma of Chinese cinnamon. This cream is specially designed to nourish and repair dry and damaged skin, and is recommended for people with a tendency to suffer from cold hands and feet due to low temperatures or extreme sports that can cause peripheral vasoconstriction in acral areas.

The regenerative and vasodilating action of Igneaderm is due to the combination of Chinese cinnamon (*Cinnamomum cassia*), chamomile (*Anthemis nobilis*), parsley (*Petroselinum crispum*) and patchouli (*Pogostemon cablin*) essential oils. These ingredients, together with calendula (*Calendula officinalis* - Soybean oil) and avocado (*Persea gratissima*) vegetable oils, provide intense nourishment and a soothing topical effect, leaving hands soft and hydrated. In summary, Igneaderm is an excellent option to take care of the skin of the hands and feet and keep them healthy and hydrated in situations of extreme weather or demanding sports activities.

Igneaderm is a cream that prevents and relieves discomfort caused by cold in areas of the body such as hands, feet, ears and nose. In addition, it helps improve circulatory problems and **Raynaud's syndrome**. This cream is capable of recovering body temperature naturally, which prevents skin symptoms associated with exposure to cold, such as chilblains, burning sensation, numbness, cramps, and paleness. Its natural ingredients, such as cinnamon essential oil, calendula oleate and Roman chamomile essential oil, have regenerative, vasodilating and anti-inflammatory properties that soothe and protect cracked and damaged skin. In addition, the formula is free of parabens, paraffins and petroleum derivatives.

#### How is Terpenic Igneaderm used?

You should apply the necessary amount to the affected area, massaging gently until completely absorbed.

In case of exposure to cold, apply the product previously and protect the exposed areas with suitable

clothing.

### What are the ingredients of Igneaderm?

Igneaderm is a product formulated only from 100% natural essential and vegetable oils, without parabens, paraffins or petroleum derivatives. Its main active ingredients are virgin avocado vegetable oil (*Persea gratissima*), calendula oleate (*Calendula Officinalis*), cinnamon bark essential oil (*Cinnamomum zeylanicum*) and Roman chamomile essential oil (*Anthemis nobilis*).

- **Avocado oil** is an excellent regenerator and skin softener, as well as having a high penetration capacity into the epidermis that allows good absorption of the rest of the active ingredients in the cream.
- **Calendula oleate**, for its part, is widely used in formulas to treat damaged and chapped skin, and improves the barrier function of the epidermis, giving the formula emollient and protective properties.
- **Cinnamon bark essential oil** provides a sensation of heat thanks to the action of its main component, cinnamaldehyde, and also favors microcirculation in the tissues thanks to its important hyperemic and blood fluidizing activity.
- **Roman chamomile essential oil** provides anti-inflammatory and analgesic activity to the formula, making it an ideal product to repair and protect damaged skin.
