

Erbaven Retard 30 Tablets

EAN: 8008843128310

FABRICANTE: TREPATDIET

Erbaven by ESI is a food supplement with dry extracts of valued plants that ensure a restorative action at the microcirculation level, ideal for tired legs.

DESCRIPTION

Erbaven Retard by Trepap Diet ESI is a food supplement with a mixture of ingredients that have been traditionally used for their great properties. Horse chestnut, as an anti-inflammatory, increasing the resistance of capillaries, Centella Asiatica, commonly used in cases of hemorrhoids and pathologies of poisonous origin, with Bilberry, antithrombotic and healing, with astringent vasoprotective action and with Butcher's broom, with a recognized vasoconstriction action.

Erbaven with Retard capsules, easy to assimilate, with gradual absorption that ensures its total content of active ingredients.

The special formula of this product makes it highly recommended for cases of venous insufficiency, cramps, leg pain and discomfort, capillary fragility, poor diet, excessive sitting or standing time, in general situations that can worsen the circulation of blood and lymphatic capillaries.
