

Candida Clear Forte 120 Capsules

EAN: 8545585564780

FABRICANTE: V.BYOTICS

Candida Clear Forte is a combination of traditional herbs (Pau D'Arco, Garlic, Walnut and Oregano Oil), Biotin (a B complex vitamin) and Caprylic Acid (a fatty acid found naturally in plant oils) which can help maintain a healthy balance in intestinal flora bacteria.

DESCRIPTION

What is Candida Albicans Forte and what is it for?

Candida albicans is a natural yeast that usually resides in the intestine as part of the normal bacterial flora.

Caprylic Acid (octanoic acid) is a medium-chain saturated fatty acid that is naturally present in palm and coconut oil, other seed oils, and animal sources. It acts as an antibiotic against various bacteria such as Staph. aureus or E. coli and especially as an antifungal to prevent the hyperproliferation of fungi such as Candida albicans, possibly due to the destruction of their cell membrane.

The active components (naphthoquinones) of Pau d'Arco have strong fungicidal and bactericidal activity and are especially active against Candida infection.

Garlic has a broad spectrum of antimicrobial activity against viruses, bacteria and fungi such as those of the Candida genus and parasites.

Walnut has interesting antiseptic, anthelmintic and antispasmodic properties.

Oregano, whose phenolic components thymol and carvacrol have antimicrobial, antispasmodic and antioxidant properties, making it one of the most powerful antiseptic substances, which is why it acts against fungal infections and parasites with great effectiveness.

Biotin helps in maintaining healthy intestinal flora, and by extension the immune system, and also makes it difficult for the Candida fungus to become hyperactive and reproduce excessively.

What is the composition of Candida Clear Forte?

Caprylic acid, pau de arco, oregano, walnut and biotin

How to use Candida Clear Forte

Take 2 capsules 2 times a day

Ingredients of Candida Clear Forte

Candida Clear Forte 120 Capsules

EAN: 8545585564780

FABRICANTE: V.BYOTICS

Ingredients for 4 capsules:

- Caprylic Acid (Sodium Caprylate) 1400 mg.
- Pau Arco (Tabebuia avellanedae lorentz) 600 mg (Bark) (Dry extract 4:1).
- Garlic (Allium sativum L.)(Bulb) 400 mg (Dry extract 25:1)(2% Allicin:8000 mcg).
- Walnut (Juglans regia L.)(Seeds) 400 mg (Dry extract 10:1).
- Oregano Oil (Origanum vulgare L) 400 mg (Powder)(2% Essential oil).
- D-Biotin 2000 mcg.
- Anti-caking agents: Magnesium stearate and Silicon dioxide.
- Capsule (Gelatin).

Precautions

Consult your doctor if you are taking anticoagulants.
