

## L Carnitine 1000 mg 50 Caps.

EAN: 4521586294028

FABRICANTE: V.BYOTICS

*L-Carnitine, a molecule known as a fat burner, intervenes in the processes of obtaining energy from fats.*

### DESCRIPTION

L-Carnitine, a molecule known as a fat burner, is involved in the process of obtaining energy from fat. In terms of sports performance, L-Carnitine significantly increases oxygen uptake and energy production. This non-essential amino acid that facilitates the passage of fatty acid groups through the mitochondrial membrane is found naturally in meat, yeast, milk and wheat germ.

This high potency L-Carnitine is found in the stable tartrate form created by L-Carnipure and is considered by specialists to be one of the highest quality forms available on the market.

### Instructions for use

Take 1 capsule 1 to 3 times daily.

### Ingredients

Per capsule:

- High Potency L-Carnitine (L-Tartrate) 1000mg.
- Other natural ingredients: gelatin (capsule), dicalcium phosphate, magnesium stearate and silica.
