

Artiflex 60 Capsules

EAN: 8436594152948

FABRICANTE: VIT.O.BEST

Recommended supplement for joints. Contains UC-II® Collagen, Glucosamine Sulfate, Chondroitin and MSM (OptiMSM®). Contains other natural bioactive substances of the highest quality. The capsules are free of titanium dioxide.

DESCRIPTION

The new improved formula of **ArtiFlex**, from **Vitobest®**, combines the action of the best active ingredients that contribute to improving joint health, recovering damaged cartilage and effectively reducing pain and inflammation.

ArtiFlex, from Vitobest®, contains UC-II® hydrolyzed collagen (Lonza).

What makes UC-II® collagen so effective?

- Resists hydrolysis in the intestine, improving absorption.
- Intestinal hydrolysis (part of the digestion process) normally eliminates much of the classic collagen, absorbing only a tiny part.
- Lonza's **UC-II®** has a unique mechanism of action that directly stimulates collagen production by chondrocytes, which are the cells of cartilage tissue responsible for tissue maintenance and collagen production.

Why is type II collagen so important in the body?

Type II collagen is the main component of cartilage tissues.

Articular cartilage is a highly specialized tissue that covers the bony surfaces that form part of the joints. It is responsible for protecting the bones of the joints and facilitating movement.

Articular cartilage does not have blood vessels, is nourished by synovial fluid superficially and bone deeply for nutrition, and has little capacity to regenerate.

Chondrocytes, the only cellular element of cartilage, are responsible for the synthesis and maintenance of the extracellular matrix, composed of 80% water and 20% solid matter, whose main components are type II collagen and proteoglycans. That is why the contribution of external collagen such as **UC-II®** is vital to

help recover lost cartilage and as a preventative.

Clinically proven.

Numerous studies demonstrate the effectiveness of **UC-II®** cartilage, both in treatment and prevention.

Research shows that **UC-II®** contributes to:

- Improve the mechanical function of the injured knee.
- Prevent deterioration of articular cartilage.

ArtiFlex, from **Vitobest®**, enhances the action of **UC-II®** cartilage by adding high-quality and proven effective active ingredients:

- **Glucosamine and chondroitin sulfate:** help recover damaged cartilage.
- **OptiMSM®:** effective in mitigating joint pain. It is a powerful natural analgesic and anti-inflammatory agent.
- **Green lip mussel:** offers a broad spectrum of Omega 3 fatty acids: EPA, DHA, ALA, SDA, DPA and ETA. The green lip mussel helps in processes related to joint inflammation.
- **Magnesium biscigliate (Albion®):** vital for joints.
- **Vitamin C:** essential for the synthesis of collagen and the fixation of new cartilage.

ArtiFlex by Vitobest® contributes to:

- Recover damaged cartilage and acts preventatively on joint health.
- Reduce inflammation and pain.
- Prevent joint injuries and mild rheumatic diseases.
- Prevent and recover from sports injuries.

Combined with **Curcumin (BCM-95®)** or **Shilajit** from **Vitobest®** it enhances its effectiveness and anti-inflammatory action.
